What it's like being an Apprentice at Network Scientific

Network Scientific has supported me through the start of my Apprenticeship and training programme. They have trained and supported me when being asked to complete office based tasks. I have gained experience supporting the Sales and Marketing and Recruitment Departments within the company to improve my knowledge on how the business works and the different services Network Scientific provides.

Since starting at Network Scientific, I have been shown enthusiasm and kindness by everyone within the office. They have been willing to train me and help me find my full potential. They have been very patient with me and have helped me gain confidence and undertake more work for the company. During my first few months at Network Scientific I have learnt a lot about the importance of good communication skills and attention to detail.

Network Scientific is a passionate and dynamic company committed to offering high quality recruitment, sales and marketing and directory services to the scientific, medical and engineering industries. Network Scientific has just had an exciting time with the launch of the southern office in Hertfordshire. After the successful year -on- year growth of Network Scientific over the last 4 years, the launch of this new office demonstrates their vision to provide the best quality services to the scientific industries.

Network Scientific has illustrated that it has good structure which enables learners like me to develop and gain their full potential. I hope to gain more experience within the next year to enable myself to progress and gain better knowledge in all areas of the scientific industry.
